The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on						
,	s action is non-final.					
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.						
Disposition of Claims						
4) \boxtimes Claim(s) <u>1-66</u> is/are pending in the application.

Art Unit: 3637

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23, 32 and 33, drawn to the combination of a computer system and a vehicle, classified in class 296, subclass 37.7.
- II. Claims 24-31, drawn to a moveable support system, classified in class248, subclass 298.1.
- IIIa. Claims 34-43 and 61-66, drawn to a flexible link and locking mechanism and method of use, classified in class 403, subclass 83.
- IIIb. Claims 44-50, drawn to a flexible link mechanism and link connectors, classified in class 403, subclass 53.
- IIIc. Claims 51-53, drawn to a flexible link mechanism with a base for connection to a vehicle, classified in class 296, subclass 37.5.
- IV. Claims 54-60, drawn to console, classified in class 312, subclass 304. The inventions are distinct, each from the other because of the following reasons:

Inventions II, IIIa-c and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II and IV have separate utility relative to inventions IIIa-c such as with the support arm of the applicant's Figure 6 and relative to each other because II can be used without a console body; invention IIIa, b and c have separate utility relative to each other because inventions IIIa and b can be used outside a vehicle and IIIb can be used without a lock. See MPEP § 806.05(d).

Art Unit: 3637

Inventions I and II-IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because, as shown in the applicant's Figures, different flexible support mechanisms can be used in the system. The subcombinations have separate utility such as outside a vehicle and as distinguished from each other above.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: the species of Figures 1-4, the species of Figure 5, the species of Figure 6, the species of Figure 7, the species of Figure 8, the species of Figure 9, the species of Figure 10 and is 9 or 10 then either Figure 13 or Figure 14.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Art Unit: 3637

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Ms. K. Horowitz on 25 June 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3637

Applicant is further advised that the reply to this requirement may result in a further election, particularly if Group I is electioned. The election of one of the Groups and one of the species may sufficiently define the invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JERRY A ANDERSON whose telephone number is 703 308 2202. The examiner can normally be reached on 9:30 - 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lanna Mai can be reached on 703 308 2486. The fax phone numbers for the organization where this application or proceeding is assigned are 703 305 3597 for regular communications and 703 305 3597 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703 308 2168.

A ANDERSON
